Did council operate sustainably?

Between 2018–19 and 2021–22, Murrindindi Shire Council reported an average **adjusted underlying result** of -5.8 per cent. An ongoing negative result suggests that, without an increase in ongoing revenue or receipt of one-off grants, ongoing revenue may not fund the range and level of services being provided.

Council could meet its current financial obligations with a reported average **working capital ratio** of 456 per cent between 2018–19 and 2021–22.

Between 2018–19 and 2021–22, council reported an average **indebtedness ratio** of 26.8 per cent. The lower the percentage, the greater a council's ability is to repay debt from revenue it controls.

Note: Some of the year-on-year changes in these financial indicators may be due to changes to accounting standards or the impact of coronavirus. See the reader's guide for more information.
