

## Minimum feed-in tariff review 2020-21

### Submission received through Engage Victoria

**Date submitted: 10 January 2020**

**Submission written by: Linda Taylor**

On 3 December 2019, we published our draft decision for the Minimum feed-in tariff review 2020-21. This draft decision paper asks stakeholders for their views on our proposed minimum feed-in tariff for 2020-21.

#### **1. What do you think of the proposed minimum feed-in tariff for 2020-21?**

I am presently on the 67 cent tariff. When this end I will be investing in batteries as appropriate to my system. This seems like a perfect opportunity for power companies to work with me and those in similar positions to soften the impact of the peak and I hope they will come up with reasonably fair prices for the power I produce and store.

I will be hunting for technicians to balance my usage and storage so that my significant outlay will be worth it.

Do hope that power companies wouldn't discourage my investment by undervaluing my megawatts.
