

Minimum feed-in tariff review 2020-21

Submission received through Engage Victoria

Date submitted: 5 December 2019

Submission written by: Kemmis R Brown

On 3 December 2019, we published our draft decision for the Minimum feed-in tariff review 2020-21. This draft decision paper asks stakeholders for their views on our proposed minimum feed-in tariff for 2020-21.

1. What do you think of the proposed minimum feed-in tariff for 2020-21?

This is not acceptable.

How about consumers pay Electricity Companies the same and stop asking Taxpayers to maintain their infrastructure? They've had long enough to recoup their investment. So 12 c/kWh for peak sounds good, considering they're going to pay 9c/kWh. Stop ripping off households that have invested in infrastructure that benefits the grid.
