

Maximum electricity prices for embedded networks and other exempt sellers

Submission received via Engage Victoria on our consultation paper on maximum prices for embedded networks and other exempt sellers

Date submitted: 11 February 2020

Submission prepared by: Anonymous

'Do you have any comments on the commission's consultation paper?'

"I think apartment blocks should be compelled to not have embedded networks and each unit should have its own meter. I am aware power retailers have 'purchased' supply rights from developers and these need to be banned now.

Caravan parks etc should be treated as now, meters are not practical and since they may be eligible for a bulk pricing deal careful examination and prevention of price gouging needs to be considered."
