

# Maximum electricity prices for embedded networks and other exempt sellers

**Submission received via Engage Victoria on our consultation paper on maximum prices for embedded networks and other exempt sellers**

**Date submitted: 19 February 2020**

**Submission prepared by: Anonymous**

**'Do you have any comments on the commission's consultation paper?'**

Energy companies are currently using embedded networks as a way to force customers to pay a hefty premium on electricity usage/daily charge. In moving house within the same distributor's catchment, I'm currently paying almost double the daily charge for supply, and an additional 12c per kilowatt. It is absolutely a roort!!
