

Maximum electricity prices for embedded networks and other exempt sellers

Submission received via Engage Victoria on our consultation paper on maximum prices for embedded networks and other exempt sellers

Date submitted: 20 February 2020

Submission prepared by: Chris Currie

'Do you have any comments on the commission's consultation paper?'

Based on the arguments put forward in the consultation paper I feel that embedded network providers do not face significant cost or overheads for supplying electricity to multi unit developments above and beyond those of direct energy retailers. As such I would urge the commission to recommend that the maximum price be pegged to the maximum price for direct energy retailers.
