**Pay a fair price for rooftop generated solar**

10/2/16

Dear Victorian Labour Government,

My rooftop Solar is fabulous.

I would like more panels, but would lose my current reimbursement (66cents) if I upgraded, as the new system would change to some miserable amount like 5cents.

Please promote rooftop solar and legislate a fair price – maybe even making solar panels compulsory in new buildings? Along with roof water storage.

In a very politically popular fell swoop you could resolve a whole range of environmental issues and quickly move Victoria a huge step towards self sufficiency.

Thank you for your consideration.
